

## VANGO FORCE10 VITESSE - ULTRALIGHT 2 PERSON TENT

IDEAL FOR ULTRALIGHT  
MOUNTAINEERING

Shorter pole.

It is easiest to peg out the footprint of the tent very loosely first, then enter the tent to secure both poles in place.

The long pole is for use at the bell-end (door) of the tent.  
Both poles sit inside fabric holes in the groundsheet, there are no sleeves for the poles.
